SUMMARY

I am studying towards my degree in Information Technology and would like an internship position where I can utilize what I've learned so far. I hope to be able to assist on real projects, build hands-on experience, and grow as part of a professional setting. I'd like to learn, work collaboratively, and be of positive influence wherever possible.

PROJECTS

1. Agrosync | MERN Stack (React, Node.js, MongoDB) 🔗

Farm productivity and decision-support web application

- Developed tools for crop management, resource planning, and data-driven farming decisions.
- Enhanced productivity by automating manual processes and providing actionable insights.

2. Edu Ceylon | React + Spring Boot + MongoDB 🔗

LMS & Social Media Hybrid Platform

- Combined Learning Management System (LMS) features with social media interactivity.
- Implemented secure Google Authentication for seamless login/registration.
- Ensured high performance and responsive design for diverse user interactions.

3. Fairy Mount Tea Factory | MERN Stack (React, Node.js, MongoDB) 🔗

Tea factory operations automation system

- Streamlined inventory, employee records, production tracking, and sales management.
- Reduced manual workload by digitizing daily operations and improving data accuracy.

SKILLS

- Programming Languages: JavaScript, Java, C, C++, HTML5, CSS3
- Frameworks & Libraries: React.js, Redux, Spring Boot, Tailwind CSS, Bootstrap, Material-UI
- Tools & Platform: npm/yarn, Webpack, Chrome DevTools, Figma
- Databases: MySQL, MongoDB
- Design & Graphics: Adobe Illustrator, Photoshop (PS)

SOFT SKILLS

- Creativity
- Adaptability
- Decision making
- Leadership
- Teamwork
- Problem Solving
